REASONS FOR ALLOWANCE

The following is an Examiner's Statement of Reasons for Allowance:

The prior arts of record teach a method of maintaining a file system in a consistent state. He also teaches a set of self-consistent blocks on disk that is rooted by the root inode is referred to as a consistency point. To implement consistency points, write anywhere file layout (WAFL) always writes new data to unallocated blocks on disk. A new consistency point occurs when the file system information (fsinfo) block is updated by writing a new root inode for the inode file into it. Hitz et al., (U.S. Patent number 5,963,962) is one such example of prior art. The prior arts of record, however, fails to teach, singly or in combination to provide a volume information block (volinfo) at a predetermined location on disk of a storage system, the volinfo block comprises a plurality of pointers configured to reference the fsinfo and persistent consistency point image fsinfo blocks. The subject matter sought to be patented as recited in the claims in this application has practical applications in the field of file systems.

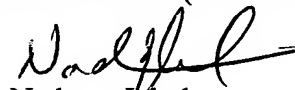

Any comments considered necessary by applicant must be submitted no later than the payment of the Issue Fee and, to avoid processing delays, should preferably **accompany** the Issue Fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance".
